GitHub: <https://github.com/eugenefacecontrol>

Portfolio: <https://eugenefacecontrol.github.io/portfolio-site/>

EU Blue Card valid until 12/2027

PROFESSIONAL SUMMARY

QA Automation Engineer / SDET with 7+ years of experience across UI automation, API testing, CI/CD-integrated quality, and environment automation. Strong foundation in **Java + Selenium WebDriver** from enterprise regression automation work, supported by broader hands-on experience with Playwright, Postman/Newman, C#, TypeScript/JavaScript, PowerShell, and Python scripting.

Experienced in building and improving reliable test automation around UI flows, REST APIs, regression suites, and pipeline-driven quality gates. Strong practical background in troubleshooting test environments, improving feedback quality, reducing automation noise, and supporting repeatable validation across Windows/Linux and VM-based setups.

Best fit for automation roles that need practical coding ability, Selenium/UI testing, REST/API validation, CI/CD awareness, and a systems-minded QA engineer who can work across tests, tooling, environments, and delivery workflows.

CORE STRENGTHS

Java + Selenium WebDriver regression automation foundation

UI automation across Selenium, Playwright, FlaUI, and Power Automate

REST API validation with Postman/Newman and automation frameworks

CI/CD-integrated test execution with Jenkins, TeamCity, and Azure DevOps

Test stability, failure triage, and maintainable regression coverage

PowerShell, C#, TypeScript/JavaScript, Java, and practical Python scripting

Environment automation across Windows/Linux, VMs, Docker, and Kubernetes support scenarios

Performance-aware troubleshooting, logs, monitoring, and delivery feedback

Practical automation mindset: removing repetitive manual steps and improving team workflows

TECHNICAL SKILLS

Automation & Testing: Selenium WebDriver, Playwright, FlaUI, Power Automate, REST API testing, Postman, Newman, Regression testing, workflow validation, system-level testing, TestRail, basic BDD/Gherkin/Cucumber exposure

Languages: Java - foundational and earlier professional automation usage, C# - strong working automation language, PowerShell - strong practical automation and environment scripting language, TypeScript / JavaScript - practical automation and tooling usage, Python - supporting scripting and automation exposure

CI/CD & Delivery: Jenkins, TeamCity, Azure DevOps, YAML pipelines, release automation, test execution in delivery workflows, Environment parameterization and repeatable validation setups

Infrastructure & Debugging: Windows, Linux, virtual machines, Docker / Kubernetes practical support experience, Azure, Bicep, Key Vault, Application Gateway, WAF/firewall, Grafana, Prometheus/Loki, Azure monitoring, Browser DevTools, Wireshark, Fiddler

PROFESSIONAL EXPERIENCE

DEFINELY - QA AUTOMATION ENGINEER

Krakow, Poland
06/2025 - 03/2026

Worked in a complex product environment with strong focus on test automation strategy, framework improvement, CI signal quality, and practical quality support across API and UI layers.

Key Contributions

- Improved and extended an existing **API automation framework** for broader team use.
- Increased automated coverage from **117 to 199 tests** without increasing total runtime.
- Reduced log output from around **1.5 GB to 11 MB** per run by removing unnecessary debug logging.
- Improved automation signal quality and made failures easier to analyze and route.
- Combined API-driven setup with UI automation to reduce scenario runtime and improve stability.
- Supported transition toward **Playwright + TypeScript** as a more maintainable UI automation direction.
- Worked with hybrid automation approaches where no-code orchestration was supported by PowerShell and Python where needed.

Relevance to DCV Role

- Strong overlap with API validation, automation maintainability, and CI feedback quality.
 - Practical experience improving test reliability and reducing noisy automation output.
 - Comfortable adapting tools to product constraints while keeping automation useful and maintainable.
-

LEAPWORK - TESTER / DEVOPS ENGINEER

Krakow, Poland / Minsk, Belarus
11/2018 - 03/2025

Longest and most formative stage of career, spanning QA automation, scripting, environment automation, infrastructure support, release processes, and internal tooling within the same product ecosystem.

Key Contributions

- Built and maintained **PowerShell scripts**, JavaScript/Tampermonkey automations, helper tools, VM utilities, installation automation, and workflow improvements.
- Automated repetitive manual processes and reduced operational friction across internal workflows.
- Supported automation and release workflows in **Azure DevOps**, YAML pipelines, and environment validation processes.
- Worked with **Azure**, **Bicep**, VMs, monitoring, logs, Key Vault, Application Gateway, WAF, and firewall-related configuration.
- Supported practical **Docker / Kubernetes** scenarios, including logs, services, debugging, and deployment-support tasks.
- Built silent installation flows, remote installation tooling, and browser-side helpers for repetitive work.

- Supported teammates with onboarding, knowledge sharing, setup, and technical troubleshooting.

Relevance to DCV Role

- Strong systems thinking across automation, test environments, CI/CD, and delivery workflows.
 - Useful background for roles where automation quality depends on stable environments and repeatable execution.
 - Practical troubleshooting mindset across UI, API, infrastructure, and pipeline layers.
-

EPAM SYSTEMS - AUTOMATION QA ENGINEER / TESTER (.NET)

Minsk, Belarus

09/2017 - 11/2018

Early enterprise automation stage that built strong coding-based QA and classic regression automation foundations.

Key Contributions

- Worked with **Java**, **C#**, **Selenium WebDriver**, and **NUnit** in enterprise automation contexts.
- Maintained and extended UI regression automation for enterprise web applications.
- Implemented and stabilized automated test cases for core business flows.
- Executed and monitored automated test runs in **Jenkins** and analyzed regression failures.
- Contributed to automation framework and documentation practices for maintainability.
- Had some exposure to mobile automation through Xamarin-related work.

Relevance to DCV Role

- Direct match with **Java + Selenium WebDriver** automation expectations.
 - Enterprise regression automation foundation with CI execution through Jenkins.
 - Good coding-based QA base for modern automation roles requiring Selenium, REST/API awareness, and maintainable tests.
-

ADDITIONAL RELEVANT EXPERIENCE

- Desktop application automation exposure in Windows-based environments using **FlaUI**, **C#/ .NET**, PowerShell, and VM-based test setups.
 - Practical performance-awareness through log reduction, pipeline feedback optimization, monitoring, and failure triage.
 - Hands-on work across product workflows, test utilities, internal tools, and repeatable validation environments.
-

EDUCATION

Belarusian State University of Informatics and Radioelectronics (BSUIR)

Bachelor of Science in Digital Economy

Minsk, Belarus

2013 - 2017
