

# Yauheni Sheima

## SENIOR QA AUTOMATION ENGINEER / SDET

Krakow, Poland  
Phone: +48 572 230 851  
Email: [yauhenisheima@gmail.com](mailto:yauhenisheima@gmail.com)  
LinkedIn: <https://www.linkedin.com/in/yauhei-sheima/>  
EU Blue Card valid until 12/2027

### PROFESSIONAL SUMMARY

Senior QA Automation Engineer / SDET with 7+ years of experience across UI/API automation, CI/CD-integrated quality, framework improvement, defect triage, environment-aware testing, and practical automation tooling.

For **Fireblocks - Senior QA Automation Engineer**, the relevant focus is Senior QA automation for fintech/security products, API and frontend automation, CI/CD feedback, logs/observability, and quality ownership. I bring a pragmatic automation mindset: build checks that give useful release signal, keep diagnostics readable, and connect test automation with developer feedback, CI/CD, logs, API/data validation, and product risk.

### CORE STRENGTHS

- UI/API automation and regression coverage
- Test design from requirements and risk areas
- Playwright/Selenium automation direction
- REST API testing, Postman/Newman, backend validation
- CI/CD-integrated quality feedback
- Defect triage, log analysis, and reproducible evidence
- SQL/data checks and environment-aware debugging
- Automation framework improvement and maintainability
- Cross-functional collaboration with developers and product teams
- AI-assisted engineering workflows with Claude Code, ChatGPT and Copilot

### TECHNICAL SKILLS

**Role-relevant stack:** API/frontend automation, fintech/crypto, logs/Datadog/Sentry, AI agents, product-quality ownership  
**Automation:** Playwright, Selenium WebDriver, API automation, Postman/Newman, REST Assured context, TestRail  
**Languages:** TypeScript/JavaScript, C#, PowerShell, Java, SQL, practical Python scripting  
**CI/CD:** Azure DevOps, Jenkins, TeamCity, GitHub Actions/GitLab CI context, YAML pipelines, Git  
**Debugging:** Browser DevTools, logs, SQL, defect triage, environment investigation  
**Infrastructure context:** Azure, Docker/Kubernetes support scenarios, Windows/Linux, monitoring/logging tools

### PROFESSIONAL EXPERIENCE

#### Definely - QA Automation Engineer

Krakow, Poland  
06/2025 - Present

- Refactored and extended an API automation framework, raising coverage from around 117 to 199 tests without adding runtime.
- Cut automation log output from around 1.5 GB to 11 MB per run, making failures easier to analyze and route.

- Used API-driven setup and backend validation to shorten scenario validation from 5+ minutes to about 1 minute.
- Started in a C# and FlaUI automation framework, then moved with the product direction toward TypeScript and Playwright.
- Supported the Playwright and TypeScript automation direction for maintainable UI checks.
- Worked with QA and developers on acceptance criteria, defect evidence, and release readiness.
- Used AI-assisted tools including Claude Code, ChatGPT and Copilot to accelerate test design, debugging and repetitive engineering work.
- Python positioned honestly as practical automation/scripting and framework-support capability; strongest long-term scripting depth remains PowerShell, TypeScript/JavaScript and C#/Java automation foundations.

## **Leapwork - QA Automation Engineer (DevOps & Automation Focus)**

**Krakow, Poland / Minsk, Belarus**

**11/2018 - 03/2025**

- Automated reproducible test and release-support environments with PowerShell, Azure DevOps YAML, Bicep and VM tooling.
- Built scripts, browser helpers and internal utilities to remove repetitive manual work and improve QA/support workflows.
- Supported CI/CD pipelines, release diagnostics, environment setup, logs, monitoring and infrastructure-aware quality work.
- Worked with Docker/Kubernetes support scenarios, Grafana/K9s/Helm, services, logs and deployment troubleshooting.
- Helped teammates with onboarding, setup, documentation and technical troubleshooting.
- Worked around enterprise application workflows including Dynamics 365 and banking-style green-screen scenarios.

## **EPAM Systems - Automation QA Engineer / Tester (.NET)**

**Minsk, Belarus**

**09/2017 - 11/2018**

- Built enterprise automation foundations with Java, C#, Selenium WebDriver and NUnit.
- Maintained and extended UI regression automation for enterprise web applications.
- Executed and monitored automated test runs in Jenkins and analyzed regression failures.
- Contributed to framework and documentation practices for maintainable automated testing.

## **ROLE-RELEVANT POSITIONING**

- Best fit: QA Automation Engineer, SDET, DevOps-aware QA, test infrastructure and API/UI automation roles.
- Strongest practical areas: automation design, API/UI testing, CI/CD feedback, framework maintainability, logs/diagnostics, environment-aware QA.
- Honest scope: Python is a practical automation/scripting and ramp-up area, not the primary multi-year production language; strongest long-term coding/scripting depth is PowerShell, C#/Java foundations, and JavaScript/TypeScript automation.

## **EDUCATION**

**Belarusian State University of Informatics and Radioelectronics (BSUIR)**

Bachelor of Science in Digital Economy

Minsk, Belarus

2013 - 2017
