

Yauheni Sheima

SOFTWARE DEVELOPMENT ENGINEER IN TEST II

Krakow, Poland

Phone: +48 572 230 851

Email: yauhenisheima@gmail.com

LinkedIn: <https://www.linkedin.com/in/yauhei-sheima/>

EU Blue Card valid until 12/2027

PROFESSIONAL SUMMARY

Senior QA Automation Engineer / SDET with 7+ years of experience across UI/API automation, CI/CD-integrated quality, framework improvement, defect triage, environment-aware testing, and practical automation tooling.

For **HackerRank - Software Development Engineer in Test II**, the relevant focus is automation-first quality across web and API systems, Playwright/TypeScript automation direction, REST API validation, CI/CD release gates, failure analysis, and mentoring quality practices across teams. I bring hands-on QA automation experience with a practical engineering style: build maintainable checks, make failures actionable, and connect automation with release readiness.

CORE STRENGTHS

UI/API automation and regression coverage

Playwright and TypeScript automation direction

REST API testing, Postman/Newman, and backend validation

CI/CD-integrated automation and release quality gates

Automation framework improvement and maintainability

Failure analysis, root-cause investigation, and readable diagnostics

Test design from acceptance criteria, workflows, and product risk

Automation code review mindset and reusable test design

Cross-functional collaboration with QA, engineering, and product teams

AI-assisted engineering workflows with Claude Code, ChatGPT, and Copilot

TECHNICAL SKILLS

Role-relevant stack: Playwright, TypeScript/JavaScript, REST API testing, CI/CD, GitHub/Jenkins context

Automation: Playwright, Selenium WebDriver, API automation, Postman/Newman, Power Automate, FlaUI, TestRail

Languages: TypeScript/JavaScript, C#, PowerShell, Java, SQL, practical Python scripting

CI/CD: Azure DevOps, Jenkins, TeamCity, GitHub Actions/GitLab CI context, YAML pipelines, Git

Testing: Regression, integration, system, end-to-end, API, acceptance criteria review, defect triage

Infrastructure context: Docker/Kubernetes support scenarios, Azure, Windows/Linux, monitoring/logging tools

PROFESSIONAL EXPERIENCE

Definely - QA Automation Engineer

Krakow, Poland

06/2025 - Present

- Refactored and extended an API automation framework, raising coverage from around 117 to 199 tests without adding runtime.
- Cut automation log output from around 1.5 GB to 11 MB per run, making failures easier to analyze and route.

- Used API-driven setup and backend validation to shorten scenario validation from 5+ minutes to about 1 minute.
- Started in a C# and FlaUI automation framework, then moved with the product direction toward TypeScript and Playwright.
- Supported maintainable UI checks and release confidence through Playwright and TypeScript automation direction.
- Worked with QA and developers on acceptance criteria, defect evidence, and release readiness.
- Used AI-assisted tools including Claude Code, ChatGPT, and Copilot to accelerate test design, debugging, and repetitive engineering work.

Leapwork - QA Automation Engineer (DevOps & Automation Focus)

Krakow, Poland / Minsk, Belarus

11/2018 - 03/2025

- Automated reproducible test and release-support environments with PowerShell, Azure DevOps YAML, Bicep, and VM tooling.
- Built scripts, browser helpers, and internal utilities to remove repetitive manual work and improve QA/support workflows.
- Supported CI/CD pipelines, release diagnostics, environment setup, logs, monitoring, and infrastructure-aware quality work.
- Worked with Docker/Kubernetes support scenarios, Grafana/K9s/Helm, services, logs, and deployment troubleshooting.
- Helped teammates with onboarding, setup, documentation, and technical troubleshooting.
- Worked around enterprise application workflows including Dynamics 365 and banking-style green-screen scenarios.

EPAM Systems - Automation QA Engineer / Tester (.NET)

Minsk, Belarus

09/2017 - 11/2018

- Built enterprise automation foundations with Java, C#, Selenium WebDriver, and NUnit.
- Maintained and extended UI regression automation for enterprise web applications.
- Executed and monitored automated test runs in Jenkins and analyzed regression failures.
- Contributed to framework and documentation practices for maintainable automated testing.

ROLE-RELEVANT POSITIONING

- Best fit: SDET, QA Automation Engineer, Playwright/TypeScript automation, CI/CD-aware QA, and API/UI automation roles.
- Strongest practical areas: automation design, framework improvement, release gates, failure diagnostics, API validation, and environment-aware QA.
- Honest scope: strong practical Playwright/TypeScript direction and web/API automation; SerenityJS, Cucumber BDD, A11y, and visual regression are adjacent ramp-up areas rather than primary long-term ownership.

EDUCATION

Belarusian State University of Informatics and Radioelectronics (BSUIR)

Bachelor of Science in Digital Economy

Minsk, Belarus

2013 - 2017
