EU Blue Card valid until 12/2027

PROFESSIONAL SUMMARY

Senior QA Automation Engineer / SDET with 7+ years of experience across UI/API automation, CI/CD-integrated quality, framework improvement, defect triage, environment-aware testing, and practical automation tooling.

For **Helius Technologies - Senior QA Engineer (Remote)**, the relevant focus is senior QA ownership across requirements review, test planning, automated and manual execution, API automation, E2E testing, bug documentation, release readiness, and fast learning in a Web3-oriented product context. I bring practical automation depth, strong troubleshooting habits, and experience improving both tests and the workflows around them.

CORE STRENGTHS

- Test planning, risk analysis, and regression strategy
- UI/API automation and release-readiness checks
- REST API testing with Postman/Newman and backend validation
- Playwright/Selenium automation direction
- JavaScript/TypeScript, C#, PowerShell, SQL, and practical Python scripting
- Agile/Scrum collaboration with developers and product stakeholders
- Defect documentation, root-cause investigation, and reproducible evidence
- CI/CD-integrated quality feedback and release support
- Quality metrics, test reporting, and process improvement
- AI-assisted engineering workflows with Claude Code, ChatGPT, and Copilot

TECHNICAL SKILLS

Role-relevant stack: API automation, Playwright/Selenium, JavaScript, Python scripting, SQL, Bash context

Automation: Playwright, Selenium WebDriver, API automation, Postman/Newman, Power Automate, FlaUI, TestRail

Languages: TypeScript/JavaScript, C#, PowerShell, Java, SQL, practical Python scripting, Bash context

CI/CD: Azure DevOps, Jenkins, TeamCity, GitHub Actions/GitLab CI context, YAML pipelines, Git

Testing: Test plans, test cases, regression, integration, E2E, risk analysis, bug tracking, release readiness

Infrastructure context: Azure, Docker/Kubernetes support scenarios, Windows/Linux, logs, monitoring tools

PROFESSIONAL EXPERIENCE

Definely - QA Automation Engineer

Krakow, Poland

06/2025 - Present

- Refactored and extended an API automation framework, raising coverage from around 117 to 199 tests without adding runtime.
- Cut automation log output from around 1.5 GB to 11 MB per run, making failures easier to analyze and route.

- Used API-driven setup and backend validation to shorten scenario validation from 5+ minutes to about 1 minute.
- Started in a C# and FlaUI automation framework, then moved with the product direction toward TypeScript and Playwright.
- Worked with QA and developers on acceptance criteria, defect evidence, scenario coverage, and release readiness.
- Used PostgreSQL and backend context in QA/testing work.
- Used AI-assisted tools including Claude Code, ChatGPT, and Copilot to accelerate test design, debugging, and repetitive engineering work.

Leapwork - QA Automation Engineer (DevOps & Automation Focus)

Krakow, Poland / Minsk, Belarus

11/2018 - 03/2025

- Automated reproducible test and release-support environments with PowerShell, Azure DevOps YAML, Bicep, and VM tooling.
- Built scripts, browser helpers, and internal utilities to remove repetitive manual work and improve QA/support workflows.
- Supported CI/CD pipelines, release diagnostics, environment setup, logs, monitoring, and infrastructure-aware quality work.
- Worked with Docker/Kubernetes support scenarios, Grafana/K9s/Helm, services, logs, and deployment troubleshooting.
- Helped teammates with onboarding, setup, documentation, and technical troubleshooting.
- Worked around enterprise application workflows including Dynamics 365 and banking-style green-screen scenarios.

EPAM Systems - Automation QA Engineer / Tester (.NET)

Minsk, Belarus

09/2017 - 11/2018

- Built enterprise automation foundations with Java, C#, Selenium WebDriver, and NUnit.
- Maintained and extended UI regression automation for enterprise web applications.
- Executed and monitored automated test runs in Jenkins and analyzed regression failures.
- Contributed to framework and documentation practices for maintainable automated testing.

ROLE-RELEVANT POSITIONING

- Best fit: Senior QA Engineer, QA Automation Engineer, SDET, API/UI automation, CI/CD-aware QA, and release quality roles.
- Strongest practical areas: automation design, API/UI testing, framework improvement, test planning, bug diagnostics, release feedback, and environment-aware QA.
- Honest scope: strong QA automation and fast learning profile; Web3/crypto domain and deep security/performance testing are ramp-up areas, not overclaimed as primary background.

EDUCATION

Belarusian State University of Informatics and Radioelectronics (BSUIR)

Bachelor of Science in Digital Economy

Minsk, Belarus

2013 - 2017
