EU Blue Card valid until 12/2027

PROFESSIONAL SUMMARY

DevOps-aligned QA Automation Engineer / SDET with 7+ years of experience in **cloud automation**, **CI/CD**, **infrastructure-as-code**, and production-focused quality engineering.

Hands-on with **Azure**, **Azure DevOps**, **PowerShell**, **Bicep**, **YAML pipelines**, **Docker/Kubernetes**, and environment automation for reliable delivery at scale. Strong record of improving pipeline feedback quality, reducing operational noise, and increasing release confidence.

Actively applying **AI-assisted engineering** (ChatGPT, Copilot, Claude Code) in automation and delivery workflows: faster diagnostics, better test/integration design, and productivity improvements. Comfortable collaborating across engineering, QA, and stakeholders to deliver secure, practical, business-aligned solutions.

ROLE-RELEVANT HIGHLIGHTS

- 7+ years in automation and DevOps-aligned engineering across QA + infrastructure workflows
 - Strong practical **Azure** + **Azure DevOps** experience in CI/CD, deployment, and environment automation
 - Advanced scripting in **PowerShell**; practical Bash/Python support usage
 - Hands-on **Docker/Kubernetes** support and operations in delivery environments
 - Practical experience with observability: **Grafana**, **Prometheus/Loki**, Azure monitoring
 - Experience introducing **AI-assisted workflows** into engineering routines
 - Strong cross-functional communication, mentoring/onboarding, and workflow ownership
-

TECHNICAL SKILLS

Cloud & Platform: Azure, Azure DevOps, Key Vault, Application Gateway, WAF, VMs

IaC & Automation: Bicep, YAML pipelines, PowerShell (advanced), Bash (basic), Python (practical support level)

CI/CD: Azure DevOps, TeamCity, Jenkins; release automation; pipeline quality gates

Containers & Runtime: Docker, Kubernetes (practical support/maintenance), Helm, K9s

Observability & Ops: Grafana, Prometheus/Loki, Azure monitoring, logs/workbooks, troubleshooting workflows

Quality Engineering: Playwright, Selenium, Postman/Newman, API/UI workflow validation, TestRail

AI Tooling: ChatGPT, GitHub Copilot, Claude Code, agent-based workflow experiments

PROFESSIONAL EXPERIENCE

Definely — QA Automation Engineer

Kraków, Poland

06/2025 – Present

- Improved API automation framework and expanded coverage from **117 to 199 tests** without runtime growth
- Reduced CI log volume from **~1.69 GB to 11 MB**, improving triage speed and delivery signal quality
- Improved time-to-validation by combining API-driven setup with UI automation in CI workflows
- Used AI-assisted tooling in day-to-day engineering tasks (analysis, refactoring support, debugging hypotheses, documentation drafts)
- Collaborated with cross-functional teams to keep automation maintainable and aligned with product priorities

Leapwork — Tester / DevOps Engineer

Kraków, Poland / Minsk, Belarus

11/2018 – 03/2025

- Automated cloud infrastructure and RBAC workflows using **PowerShell, Bicep, and YAML**
- Designed and maintained reproducible environments across stages, improving reliability of test and release cycles
- Integrated automation and environment workflows into **CI/CD pipelines** for faster, more reliable feedback
- Supported secure infrastructure setup with WAF/firewall-related configuration and operational controls
- Worked across Linux/Windows for deployment, troubleshooting, and automation support
- Built internal tooling to remove repetitive operations and improve team productivity
- Used Docker/Kubernetes-based services in practical support and maintenance scenarios
- Helped onboard and support teammates, acting as a technical bridge across QA and engineering

EPAM Systems — Automation QA Engineer / Tester (.NET)

Minsk, Belarus

09/2017 – 11/2018

- Built foundational automation in Java/C# with Selenium WebDriver and NUnit
- Contributed to enterprise regression automation and maintainable test practices

EDUCATION

Belarusian State University of Informatics and Radioelectronics (BSUIR)

Bachelor of Science in Digital Economy

Minsk, Belarus (2013–2017)
