

Yauheni Sheima

SENIOR AUTOMATION QA ENGINEER WITH AI

Krakow, Poland
Phone: +48 572 230 851
Email: yauhenisheima@gmail.com
LinkedIn: <https://www.linkedin.com/in/yauhei-sheima/>
EU Blue Card valid until 12/2027

PROFESSIONAL SUMMARY

Senior QA Automation Engineer / SDET with 7+ years of experience across API/UI automation, CI/CD-integrated quality, test framework improvement, environment-aware debugging, and practical AI-assisted engineering workflows.

Relevant to Svitla's AI-focused AQA role through API-driven testing, Playwright automation direction, REST services validation, PostgreSQL/testing context, CI/CD pipelines, test strategy ownership, and hands-on use of AI tools such as Claude, ChatGPT, Copilot-style assistants, and agent-based workflows to improve test design, debugging, and productivity.

CORE STRENGTHS

- API, backend, UI, and end-to-end test automation
- Playwright and TypeScript automation direction
- REST API testing, Postman/Newman, and service validation
- PostgreSQL/SQL investigation and data validation
- CI/CD-integrated testing with Jenkins, TeamCity, Azure DevOps, YAML pipelines
- GitHub Actions ramp-up from CI/CD and YAML pipeline background
- AI-assisted test design, debugging, and workflow optimization
- Test strategy, acceptance criteria, reporting, and quality feedback
- Microservices/API-driven systems testing readiness
- Service mocking and contract testing ramp-up readiness

TECHNICAL SKILLS

Automation: Playwright, Selenium WebDriver, API automation, Postman/Newman, TestRail, FlaUI, Power Automate

Languages: TypeScript/JavaScript, C#, Java, PowerShell, SQL, practical Python scripting

CI/CD: Jenkins, TeamCity, Azure DevOps, YAML pipelines, Git, GitHub Actions ramp-up readiness

Data/Debugging: PostgreSQL, Browser DevTools, logs, SQL validation, defect triage, environment investigation

Infrastructure Context: Azure, Docker, Kubernetes support scenarios, Windows/Linux, virtual machines

PROFESSIONAL EXPERIENCE

DEFINELY - QA AUTOMATION ENGINEER

Krakow, Poland
06/2025 - Present

- Improved and extended an existing API automation framework for broader team use.
- Increased automated coverage from around 117 to 199 tests without increasing total runtime.

- Reduced noisy log output from around 1.5 GB to 11 MB per run, improving failure analysis and triage.
- Used PostgreSQL/backend context in QA work for validation, investigation, and defect analysis.
- Combined API-driven setup, UI automation direction, and practical debugging to improve quality feedback.
- Supported transition toward Playwright with TypeScript as a maintainable UI automation direction.
- Used modern AI-assisted tooling and agent-style workflows to speed up analysis, scripting, and test-support tasks.

LEAPWORK - TESTER / DEVOPS ENGINEER

Krakow, Poland / Minsk, Belarus

11/2018 - 03/2025

- Built PowerShell scripts, JavaScript/Tampermonkey automations, helper tools, VM utilities, installation automation, and internal workflow tools.
- Automated repetitive manual flows and improved reproducibility of environment, release, and support checks.
- Worked with Azure DevOps, YAML pipelines, monitoring, logs, virtual machines, Bicep, and infrastructure-aware delivery workflows.
- Supported complex enterprise application workflows with manual investigation, automation, scripting, and cross-team troubleshooting.
- Worked with Docker/Kubernetes support scenarios including logs, services, debugging, and deployment-support tasks.
- Helped teammates with onboarding, setup, knowledge sharing, and technical troubleshooting.

EPAM SYSTEMS - AUTOMATION QA ENGINEER / TESTER (.NET)

Minsk, Belarus

09/2017 - 11/2018

- Worked with Java, C#, Selenium WebDriver, NUnit, and Jenkins in enterprise automation contexts.
- Maintained and extended UI regression automation for enterprise web applications.
- Built the foundation for maintainable automated test scripts, reusable helpers, CI failure analysis, and structured defect reporting.

ROLE-RELEVANT POSITIONING

AI-assisted QA: Practical daily use of AI tools for analysis, scripting, debugging support, and workflow acceleration. Strong fit for teams that want AI to improve test design and maintenance without replacing engineering judgment.

API and microservices testing: Strong transferable background through REST API framework improvement, backend validation, SQL/PostgreSQL investigation, logs, and CI feedback loops. Contract testing and WireMock/Pact can be ramped up from the same API/service testing foundation.

Playwright/GitHub Actions: Playwright is a recent practical direction supported by broader automation experience. GitHub Actions can be ramped up from Azure DevOps/Jenkins/YAML pipeline experience.

EDUCATION

Belarusian State University of Informatics and Radioelectronics (BSUIR)

Bachelor of Science in Digital Economy, 2013 - 2017
