EU Blue Card valid until 12/2027

IDENTITY / POSITIONING

SDET / QA Automation Engineer focused on Java/Selenium-relevant regression automation, API testing, CI/CD feedback, SQL/database validation, and practical test maintainability.

SHORT RECRUITER SUMMARY

QA Automation Engineer with 7+ years of experience across UI/API automation, CI/CD, framework improvement, and environment-aware testing. Earlier professional foundation with Java and Selenium WebDriver, plus broader hands-on work with REST API validation, Playwright, C#, TypeScript/JavaScript, PowerShell, SQL/PostgreSQL, Jenkins, TeamCity, Azure DevOps, Git, Jira, and test automation frameworks.

PROFESSIONAL SUMMARY

SDET / QA Automation Engineer with 7+ years of experience across UI automation, API testing, CI/CD-integrated quality, regression coverage, and environment-aware test automation. Strong practical background in improving automation reliability, reducing noisy test output, debugging failures through logs and data, and supporting maintainable test execution in delivery pipelines.

Relevant to this role: earlier professional foundation with **Java and Selenium WebDriver** in enterprise regression automation, broader hands-on automation experience with REST API validation, Playwright, C#, TypeScript/JavaScript, PowerShell, SQL/PostgreSQL, Jenkins, TeamCity, and Azure DevOps. Comfortable working with Java syntax and object-oriented automation code; strongest current languages are C#, TypeScript/JavaScript, and PowerShell.

Best fit for SDET roles that need a practical automation engineer who can work across UI tests, API checks, CI/CD pipelines, SQL/database validation, failure analysis, and test maintainability.

CORE STRENGTHS

Java + Selenium WebDriver enterprise automation foundation

UI automation across Selenium WebDriver, Playwright, FlaUI, and Power Automate

REST API validation and API automation framework improvement

CI/CD-integrated test execution with Jenkins, TeamCity, and Azure DevOps

SQL / PostgreSQL database validation and test-data investigation

Regression coverage, smoke checks, failure triage, and defect analysis

BDD/Gherkin/Cucumber familiarity from automation design patterns and test specification style

Git, Maven-style build workflow familiarity, YAML pipelines, and release support

Logs, debugging, monitoring, and environment-aware quality engineering

Practical automation mindset: reducing manual work and improving team feedback loops

MAIN STACK

ADDITIONAL TOOLS / TECHNOLOGIES

TECHNICAL SKILLS

Automation & Testing: Selenium WebDriver, Playwright, FlaUI, Power Automate, REST API testing, Postman, Newman, API automation frameworks, Regression testing, smoke testing, workflow validation, system-level testing, BDD / Gherkin / Cucumber familiarity, test design, test maintenance, TestRail, Jira, defect lifecycle, failure triage

Languages: Java - foundational and earlier professional automation usage, C# - strong working automation language, TypeScript / JavaScript - practical automation and tooling usage, PowerShell - strong practical automation and environment scripting language, Python - supporting scripting and automation exposure, SQL - database testing and investigation

CI/CD & Delivery: Jenkins, TeamCity, Azure DevOps, YAML pipelines, pipeline-integrated test execution, release automation, Git, build/release troubleshooting, repeatable validation workflows, Maven/Ant-style build management familiarity from Java automation ecosystems

Infrastructure & Debugging: Windows, Linux, virtual machines, PostgreSQL, practical database validation, Docker / Kubernetes support scenarios, Azure, Bicep, Key Vault, Application Gateway, WAF/firewall, Grafana, Prometheus/Loki, Azure monitoring, Browser DevTools, Wireshark, Fiddler, application logs

EXPERIENCE

DEFINELY - QA AUTOMATION ENGINEER

Krakow, Poland
06/2025 - Present

Worked in a complex product environment with strong focus on API automation, test framework improvement, CI signal quality, and pragmatic UI automation strategy.

Key Contributions

- Improved and extended an existing **API automation framework** for broader team use.
- Increased automated coverage from **117 to 199 tests** without increasing total runtime.
- Reduced log output from around **1.5 GB to 11 MB** per run by removing unnecessary debug logging.
- Improved automation signal quality and made failures easier to analyze, debug, and route.
- Used **PostgreSQL** context in QA/testing work for backend validation and investigation.
- Combined API-driven setup with UI automation to reduce scenario runtime and improve stability.
- Supported transition toward **Playwright + TypeScript** as a maintainable UI automation direction.
- Worked with hybrid automation approaches where no-code orchestration was supported by **PowerShell** and **Python** where needed.

Relevance to Wipro SDET Role

- Directly relevant to API automation, framework improvement, SQL/database validation, debugging, and CI feedback quality.
- Strong evidence of improving test maintainability and failure analysis without inflating execution time.

LEAPWORK - TESTER / DEVOPS ENGINEER

Krakow, Poland / Minsk, Belarus

11/2018 - 03/2025

Long-term product work spanning QA automation, scripting, internal tooling, environment automation, infrastructure support, release processes, and delivery workflows.

Key Contributions

- Built and maintained **PowerShell scripts**, JavaScript/Tampermonkey automations, helper tools, VM utilities, installation automation, and workflow improvements.
- Automated repetitive manual processes and reduced operational friction across internal workflows.
- Supported automation and release workflows in **Azure DevOps**, YAML pipelines, and environment validation processes.
- Worked with **Azure**, **Bicep**, VMs, monitoring, logs, Key Vault, Application Gateway, WAF, and firewall-related configuration.
- Supported practical **Docker / Kubernetes** scenarios, including logs, services, debugging, and deployment-support tasks.
- Built silent installation flows, remote installation tooling, and browser-side helpers for repetitive work.
- Supported teammates with onboarding, knowledge sharing, setup, and technical troubleshooting.

Relevance to Wipro SDET Role

- Strong overlap with CI/CD pipeline work, debugging through logs, Git-based workflows, and stable test-environment support.
- Useful background for SDET work where automation quality depends on reliable environments and repeatable execution.

EPAM SYSTEMS - AUTOMATION QA ENGINEER / TESTER (.NET)

Minsk, Belarus

09/2017 - 11/2018

Enterprise automation stage that built the classic coding-based QA foundation, including Java/C# automation and Selenium WebDriver regression work.

Key Contributions

- Worked with **Java**, **C#**, **Selenium WebDriver**, and **NUnit** in enterprise automation contexts.
- Maintained and extended UI regression automation for enterprise web applications.
- Implemented and stabilized automated test cases for core business flows.
- Executed and monitored automated test runs in **Jenkins** and analyzed regression failures.
- Contributed to automation framework and documentation practices for maintainability.
- Had some exposure to mobile automation through Xamarin-related work.

Relevance to Wipro SDET Role

- Direct match with **Java + Selenium WebDriver** automation expectations.
- Enterprise regression automation foundation with CI execution through Jenkins.

- Good base for Java/Selenium-heavy SDET work requiring maintainable tests, debugging, and CI awareness.

ADDITIONAL RELEVANT EXPERIENCE

- Practical API testing experience with REST services, Postman/Newman, automation frameworks, and test setup/validation workflows.
- SQL/database testing and investigation experience, including PostgreSQL on the latest project.
- Familiarity with BDD/Gherkin/Cucumber-style specification and automation design; strongest hands-on experience is broader UI/API automation rather than long-term Cucumber framework ownership.
- Comfortable ramping into Java testing ecosystems where the project already has established frameworks, build tools, and code conventions.

EDUCATION

Belarusian State University of Informatics and Radioelectronics (BSUIR)

Bachelor of Science in Digital Economy

Minsk, Belarus

2013 - 2017
