

# Yauheni Sheima

## QA AUTOMATION SPECIALIST

Krakow, Poland

Phone: +48 572 230 851

Email: [yauhenisheima@gmail.com](mailto:yauhenisheima@gmail.com)

LinkedIn: <https://www.linkedin.com/in/yauhei-sheima/>

EU Blue Card valid until 12/2027

---

## PROFESSIONAL SUMMARY

QA Automation Engineer / SDET with 7+ years of experience across UI/API testing, automation support, CI/CD-integrated quality workflows, framework improvement, defect investigation, and release validation.

Relevant to Xebia's QA Automation Specialist role through Playwright and TypeScript automation direction, API testing, CI/CD quality gates, test strategy/documentation, shift-left QA, environment-aware debugging, and pragmatic AI-assisted QA workflows.

---

## SHORT RECRUITER SUMMARY

QA Automation Engineer with strong fit for Xebia's Playwright/TypeScript, API, CI/CD, quality-gate, shift-left QA, and AI-powered testing direction. Best overlap: web/API automation, test strategy, pipeline feedback, defect analysis, and engineering collaboration. Ramp-up topics: visual regression baseline management, Redis/cache-specific scenarios, AB testing / feature flags, and structured GenAI workflows.

---

## MAIN STACK

## MAIN STACK

---

## CORE STRENGTHS

Playwright and TypeScript automation direction    Page Object Model, async patterns, fixtures, and maintainable test design

Web application E2E, API, smoke, and regression testing

REST API validation and contract-testing concept awareness

JSON schema validation and third-party / supplier integration test thinking

CI/CD-integrated automated test suites and quality feedback

Quality gates, parallel execution strategy, reporting, and post-deployment smoke checks

Test strategy, test documentation, and quality metrics    Shift-left QA and early defect detection

Test data, environment, and staging/pre-production validation

Browser DevTools, logs, SQL, and backend investigation

Multi-viewport, visual regression, and baseline-management ramp-up readiness

Feature flags, AB testing, and deterministic variant-control test thinking

AI-powered / AI-assisted test generation, triage, coverage review, and deduplication with human validation

---

## TECHNICAL SKILLS

**Automation:** Playwright, Selenium WebDriver, API automation, Postman/Newman, Page Object Model, fixtures/async pattern readiness, test framework improvement, visual regression ramp-up readiness

**Languages:** TypeScript/JavaScript, C#, Java, PowerShell, SQL, practical Python scripting

**CI/CD:** Azure DevOps, Jenkins, TeamCity, YAML pipelines, Git, GitHub Actions/GitLab CI/CircleCI readiness, deployment quality gates

**Testing:** UI, API, E2E, smoke, regression, exploratory, integration, JSON schema validation awareness, contract-testing concepts, AB testing and feature-flag test design

**Debugging:** Browser DevTools, logs, SQL validation, environment troubleshooting, cached vs. live data investigation, defect triage

**Infrastructure Context:** Azure, Docker/Kubernetes support scenarios, Redis/cache behavior awareness, staging/pre-production environments, Windows/Linux

**AI-assisted QA:** test idea generation, flaky-test triage support, coverage analysis, test deduplication, structured prompt patterns and GenAI workflow experimentation

---

## **ADDITIONAL TOOLS / TECHNOLOGIES**

## **ADDITIONAL TOOLS / TECHNOLOGIES**

---

## **EXPERIENCE**

### **DEFINELY - QA AUTOMATION ENGINEER**

**Krakow, Poland**

**06/2025 - Present**

- Improved and extended an API automation framework, increasing coverage from around 117 to 199 automated tests without increasing total runtime.
- Reduced automation log output from around 1.5 GB to 11 MB per run, making failures easier to analyze and route.
- Used API-driven setup, backend validation, and SQL/log investigation to shorten scenario validation from 5+ minutes to about 1 minute.
- Supported the Playwright and TypeScript automation direction for maintainable UI checks.
- Worked with QA and developers on acceptance criteria, defect evidence, quality feedback, and release readiness.
- Used AI-assisted workflows pragmatically for repetitive QA work, test ideas, review support, and documentation while keeping human validation central.

### **LEAPWORK - TESTER / DEVOPS ENGINEER**

**Krakow, Poland / Minsk, Belarus**

**11/2018 - 03/2025**

- Built PowerShell scripts, JavaScript/Tampermonkey automations, helper tools, VM utilities, installation automation, and workflow improvements.
- Automated repetitive manual workflows and improved reproducibility of environment, release, and support checks.
- Supported Azure DevOps, YAML pipelines, monitoring, logs, virtual machines, Bicep, and infrastructure-aware delivery workflows.
- Worked with Docker/Kubernetes support scenarios including logs, services, practical debugging, and deployment-support tasks.
- Helped teams troubleshoot product, environment, and delivery issues with practical systems context.
- Improved internal documentation and shared technical knowledge to make complex workflows easier for QA, support, and engineering teams.

## **EPAM SYSTEMS - AUTOMATION QA ENGINEER / TESTER (.NET)**

**Minsk, Belarus**

**09/2017 - 11/2018**

- Developed and maintained Selenium WebDriver regression tests with C#, Java, NUnit, and Jenkins.
  - Analyzed CI failures, prepared defect evidence, and supported enterprise release quality.
  - Added reusable helpers and documentation for maintainable automation work.
- 

## **EDUCATION**

**Belarusian State University of Informatics and Radioelectronics (BSUIR)**

Bachelor of Science in Digital Economy, 2013 - 2017
