EU Blue Card valid until 12/2027

PROFESSIONAL SUMMARY

Senior QA Automation Engineer / SDET with 7+ years of experience across UI/API automation, CI/CD-integrated quality, framework improvement, defect triage, environment-aware testing, and practical automation tooling.

For **Aegistech - Playwright Test Automation Engineer**, the relevant focus is Playwright and TypeScript automation, end-to-end and integration coverage for web products and APIs, CI/CD feedback, practical debugging, and senior QA ownership in fast-moving delivery environments. I bring a pragmatic automation mindset: build checks that give useful release signal, keep diagnostics readable, and connect test automation with developer feedback, logs, API/data validation, and product risk.

CORE STRENGTHS

UI/API automation and regression coverage

Playwright and TypeScript automation direction

REST API testing, backend validation, and reproducible defect evidence

CI/CD-integrated quality feedback and release support

Test design from requirements, workflows, and risk areas

Automation framework improvement and maintainability

Log analysis, SQL/data checks, and environment-aware debugging

Cross-functional collaboration with developers, QA, and stakeholders

Practical leadership through ownership, troubleshooting, and delivery support

AI-assisted engineering workflows with Claude Code, ChatGPT, and Copilot

TECHNICAL SKILLS

Role-relevant stack: Playwright, TypeScript, web/API automation, CI/CD, debugging

Automation: Playwright, Selenium WebDriver, API automation, Postman/Newman, REST Assured context, TestRail

Languages: TypeScript/JavaScript, C#, PowerShell, Java, SQL, practical Python scripting

CI/CD: Azure DevOps, Jenkins, TeamCity, GitHub Actions/GitLab CI context, YAML pipelines, Git

Debugging: Browser DevTools, logs, SQL, defect triage, environment investigation

Infrastructure context: Azure, Docker/Kubernetes support scenarios, Windows/Linux, monitoring/logging tools

PROFESSIONAL EXPERIENCE

Definely - QA Automation Engineer

Krakow, Poland

06/2025 - Present

- Refactored and extended an API automation framework, raising coverage from around 117 to 199 tests without adding runtime.

- Cut automation log output from around 1.5 GB to 11 MB per run, making failures easier to analyze and route.
- Used API-driven setup and backend validation to shorten scenario validation from 5+ minutes to about 1 minute.
- Started in a C# and FlaUI automation framework, then moved with the product direction toward TypeScript and Playwright.
- Supported the Playwright and TypeScript automation direction for maintainable UI checks and better release confidence.
- Worked with QA and developers on acceptance criteria, defect evidence, and release readiness.
- Used AI-assisted tools including Claude Code, ChatGPT, and Copilot to accelerate test design, debugging, and repetitive engineering work.

Leapwork - QA Automation Engineer (DevOps & Automation Focus)

Krakow, Poland / Minsk, Belarus

11/2018 - 03/2025

- Automated reproducible test and release-support environments with PowerShell, Azure DevOps YAML, Bicep, and VM tooling.
- Built scripts, browser helpers, and internal utilities to remove repetitive manual work and improve QA/support workflows.
- Supported CI/CD pipelines, release diagnostics, environment setup, logs, monitoring, and infrastructure-aware quality work.
- Worked with Docker/Kubernetes support scenarios, Grafana/K9s/Helm, services, logs, and deployment troubleshooting.
- Helped teammates with onboarding, setup, documentation, and technical troubleshooting.
- Worked around enterprise application workflows including Dynamics 365 and banking-style green-screen scenarios.

EPAM Systems - Automation QA Engineer / Tester (.NET)

Minsk, Belarus

09/2017 - 11/2018

- Built enterprise automation foundations with Java, C#, Selenium WebDriver, and NUnit.
- Maintained and extended UI regression automation for enterprise web applications.
- Executed and monitored automated test runs in Jenkins and analyzed regression failures.
- Contributed to framework and documentation practices for maintainable automated testing.

ROLE-RELEVANT POSITIONING

- Best fit: QA Automation Engineer, SDET, Playwright/TypeScript automation, CI/CD-aware QA, and API/UI automation roles.
- Strongest practical areas: automation design, API/UI testing, framework improvement, release feedback, logs/diagnostics, and environment-aware QA.
- Honest scope: strongest recent experience is modern web/API automation and tooling rather than direct electronic trading domain ownership; Java remains solid automation foundation experience rather than the primary recent stack.

EDUCATION

Belarusian State University of Informatics and Radioelectronics (BSUIR)

Bachelor of Science in Digital Economy

Minsk, Belarus
2013 - 2017
