EU Blue Card valid until 12/2027

PROFESSIONAL SUMMARY

Senior QA Automation Engineer / SDET with 7+ years of experience across UI/API testing, automation support, CI/CD-integrated quality workflows, framework improvement, defect investigation, test documentation, and release validation.

Relevant to Antal Sp. z o.o.'s Test Automation Engineer Lead (Cybersecurity) role through CI/CD quality feedback, performance testing awareness, UI automation, API validation, regression testing, defect investigation, test documentation, defect investigation, release-quality feedback, and practical collaboration with engineering teams.

SHORT RECRUITER SUMMARY

Senior QA Automation Engineer / SDET profile for Antal Sp. z o.o.'s Test Automation Engineer Lead (Cybersecurity) role. Best overlap: CI/CD quality feedback, performance testing awareness, UI automation, API validation, regression testing, defect investigation, test maintainability, CI feedback, and evidence-based defect work.

MAIN STACK

MAIN STACK

CORE STRENGTHS

- CI/CD quality feedback
 - performance testing awareness
 - UI automation
 - API validation
 - regression testing
 - defect investigation
 - test documentation
 - Agile collaboration
 - Requirement analysis and risk-based test design
 - Maintainable regression, smoke, UI, API, and integration checks
 - Logs, SQL, Browser DevTools, and backend investigation for defect evidence
 - CI/CD-integrated test feedback and release support
 - Clear test documentation and cross-functional communication
 - AI-assisted test ideas, debugging, and repetitive workflow automation with human review
-

TECHNICAL SKILLS

Automation: API validation, Playwright direction, Selenium WebDriver, REST API testing, Postman/Newman, test framework improvement

Languages: TypeScript/JavaScript, C#, Java, PowerShell, SQL, practical Python scripting

CI/CD: CI/CD quality feedback, Azure DevOps, Jenkins, TeamCity, Git, GitHub Actions readiness, deployment quality gates

Testing: performance testing awareness, UI automation, API validation, regression testing, UI, API, E2E, smoke, regression, exploratory

Debugging: Browser DevTools, logs, SQL validation, environment troubleshooting, defect triage
Infrastructure Context: Azure, Docker/Kubernetes support scenarios, Windows/Linux, staging environments
AI-assisted QA: test idea generation, debugging support, codebase navigation, coverage review, and repetitive workflow automation

EXPERIENCE

DEFINELY - QA AUTOMATION ENGINEER

Krakow, Poland
06/2025 - Present

- Improved and extended an API automation framework, increasing coverage from around 117 to 199 automated tests without increasing total runtime.
- Reduced automation log output from around 1.5 GB to 11 MB per run, making failures easier to analyze and route.
- Used API-driven setup, backend validation, and SQL/log investigation to shorten scenario validation from 5+ minutes to about 1 minute.
- Supported the Playwright and TypeScript automation direction for maintainable UI checks.
- Worked with QA and developers on acceptance criteria, defect evidence, quality feedback, and release readiness.
- Used AI-assisted workflows for repetitive QA work, test ideas, review support, debugging, and documentation while keeping human validation central.

LEAPWORK - QA AUTOMATION ENGINEER (DEVOPS & AUTOMATION FOCUS)

Krakow, Poland / Minsk, Belarus
11/2018 - 03/2025

- Built PowerShell scripts, JavaScript/Tampermonkey automations, helper tools, VM utilities, installation automation, and workflow improvements.
- Automated repetitive manual workflows and improved reproducibility of environment, release, and support checks.
- Supported Azure DevOps, YAML pipelines, monitoring, logs, virtual machines, Bicep, and infrastructure-aware delivery workflows.
- Worked with Docker/Kubernetes support scenarios including logs, services, practical debugging, and deployment-support tasks.
- Helped teams troubleshoot product, environment, and delivery issues with practical systems context.
- Improved internal documentation and shared technical knowledge to make complex workflows easier for QA, support, and engineering teams.

EPAM SYSTEMS - AUTOMATION QA ENGINEER / TESTER (.NET)

Minsk, Belarus
09/2017 - 11/2018

- Developed and maintained Selenium WebDriver regression tests with C#, Java, NUnit, and Jenkins.
 - Analyzed CI failures, prepared defect evidence, and supported enterprise release quality.
 - Added reusable helpers and documentation for maintainable automation work.
-

VACANCY FIT NOTES

- Role context: Test Automation Engineer Lead (Cybersecurity); Stack: CI/CD, Performance

- Positioning note: Imported from ranked shortlist CSV. Vacancy: Test Automation Engineer Lead (Cybersecurity).
-

EDUCATION

Belarusian State University of Informatics and Radioelectronics (BSUIR)

Bachelor of Science in Digital Economy, 2013 - 2017
