## QA AUTOMATION ENGINEER (LOW-CODE PLATFORM)

Krakow, Poland  
Phone: +48 572 230 851  
Email: [yauhenisheima@gmail.com](mailto:yauhenisheima@gmail.com)  
LinkedIn: <https://www.linkedin.com/in/yauhei-sheima/>  
EU Blue Card valid until 12/2027

### PROFESSIONAL SUMMARY

Senior QA Automation Engineer / SDET with 7+ years of experience across UI/API testing, automation support, CI/CD-integrated quality workflows, framework improvement, defect investigation, test documentation, and release validation.

Relevant to Britenet's QA Automation Engineer (Low-Code Platform) role through REST API testing, UI automation, API validation, regression testing, defect investigation, test documentation, Agile collaboration, defect investigation, release-quality feedback, and practical collaboration with engineering teams.

### SHORT RECRUITER SUMMARY

Senior QA Automation Engineer / SDET profile for Britenet's QA Automation Engineer (Low-Code Platform) role. Best overlap: REST API testing, UI automation, API validation, regression testing, defect investigation, test documentation, test maintainability, CI feedback, and evidence-based defect work.

### MAIN STACK

### MAIN STACK

### CORE STRENGTHS

- REST API testing
- UI automation
- API validation
- regression testing
- defect investigation
- test documentation
- Agile collaboration
- Requirement analysis and risk-based test design
- Maintainable regression, smoke, UI, API, and integration checks
- Logs, SQL, Browser DevTools, and backend investigation for defect evidence
- CI/CD-integrated test feedback and release support
- Clear test documentation and cross-functional communication
- AI-assisted test ideas, debugging, and repetitive workflow automation with human review

### TECHNICAL SKILLS

**Automation:** REST API testing, API validation, Playwright direction, Selenium WebDriver, Postman/Newman, test framework improvement

**Languages:** TypeScript/JavaScript, C#, Java, PowerShell, SQL, practical Python scripting

**CI/CD:** Azure DevOps, Jenkins, TeamCity, Git, GitHub Actions readiness, deployment quality gates

**Testing:** REST API testing, UI automation, API validation, regression testing, UI, API, E2E, smoke, regression, exploratory

**Debugging:** Browser DevTools, logs, SQL validation, environment troubleshooting, defect triage

**Infrastructure Context:** Azure, Docker/Kubernetes support scenarios, Windows/Linux, staging environments

**AI-assisted QA:** test idea generation, debugging support, codebase navigation, coverage review, and repetitive workflow automation

---

## EXPERIENCE

### DEFINELY - QA AUTOMATION ENGINEER

**Krakow, Poland**  
**06/2025 - Present**

- Improved and extended an API automation framework, increasing coverage from around 117 to 199 automated tests without increasing total runtime.
- Reduced automation log output from around 1.5 GB to 11 MB per run, making failures easier to analyze and route.
- Used API-driven setup, backend validation, and SQL/log investigation to shorten scenario validation from 5+ minutes to about 1 minute.
- Supported the Playwright and TypeScript automation direction for maintainable UI checks.
- Worked with QA and developers on acceptance criteria, defect evidence, quality feedback, and release readiness.
- Used AI-assisted workflows for repetitive QA work, test ideas, review support, debugging, and documentation while keeping human validation central.

### LEAPWORK - QA AUTOMATION ENGINEER (DEVOPS & AUTOMATION FOCUS)

**Krakow, Poland / Minsk, Belarus**  
**11/2018 - 03/2025**

- Built PowerShell scripts, JavaScript/Tampermonkey automations, helper tools, VM utilities, installation automation, and workflow improvements.
- Automated repetitive manual workflows and improved reproducibility of environment, release, and support checks.
- Supported Azure DevOps, YAML pipelines, monitoring, logs, virtual machines, Bicep, and infrastructure-aware delivery workflows.
- Worked with Docker/Kubernetes support scenarios including logs, services, practical debugging, and deployment-support tasks.
- Helped teams troubleshoot product, environment, and delivery issues with practical systems context.
- Improved internal documentation and shared technical knowledge to make complex workflows easier for QA, support, and engineering teams.

### EPAM SYSTEMS - AUTOMATION QA ENGINEER / TESTER (.NET)

**Minsk, Belarus**  
**09/2017 - 11/2018**

- Developed and maintained Selenium WebDriver regression tests with C#, Java, NUnit, and Jenkins.
- Analyzed CI failures, prepared defect evidence, and supported enterprise release quality.
- Added reusable helpers and documentation for maintainable automation work.

---

## VACANCY FIT NOTES

- Role context: QA Automation Engineer (Low-Code Platform); Stack: REST, API

- Positioning note: Imported from ranked shortlist CSV. Vacancy: QA Automation Engineer (Low-Code Platform).
- 

## **EDUCATION**

### **Belarusian State University of Informatics and Radioelectronics (BSUIR)**

Bachelor of Science in Digital Economy, 2013 - 2017
