## QA AUTOMATION ENGINEER WITH C# (MID/SENIOR)

Krakow, Poland

Phone: +48 572 230 851

Email: [yauhenisheima@gmail.com](mailto:yauhenisheima@gmail.com)

LinkedIn: <https://www.linkedin.com/in/yauhei-sheima/>

EU Blue Card valid until 12/2027

---

### PROFESSIONAL SUMMARY

Senior QA Automation Engineer / SDET with 7+ years of experience across UI/API testing, automation support, CI/CD-integrated quality workflows, framework improvement, defect investigation, test documentation, and release validation.

Relevant to Edge One Solutions Sp. z o.o.'s QA Automation Engineer with C# (Mid/Senior) role through Playwright, Selenium WebDriver, C# / .NET, REST API testing, CI/CD quality feedback, Docker / Kubernetes support context, manual test design, defect investigation, release-quality feedback, and practical collaboration with engineering teams.

---

### SHORT RECRUITER SUMMARY

Senior QA Automation Engineer / SDET profile for Edge One Solutions Sp. z o.o.'s QA Automation Engineer with C# (Mid/Senior) role. Best overlap: Playwright, Selenium WebDriver, C# / .NET, REST API testing, CI/CD quality feedback, Docker / Kubernetes support context, test maintainability, CI feedback, and evidence-based defect work. Ramp-up topics: German language.

---

### MAIN STACK

### MAIN STACK

---

### CORE STRENGTHS

Playwright Selenium WebDriver C# / .NET REST API testing CI/CD quality feedback  
Docker / Kubernetes support context manual test design  
Requirement analysis and risk-based test design Maintainable regression, smoke, UI, API, and integration checks  
Logs, SQL, Browser DevTools, and backend investigation for defect evidence  
CI/CD-integrated test feedback and release support  
Clear test documentation and cross-functional communication  
AI-assisted test ideas, debugging, and repetitive workflow automation with human review

---

### TECHNICAL SKILLS

**Automation:** Playwright, Selenium WebDriver, REST API testing, Playwright direction, Postman/Newman, test framework improvement

**Languages:** C# / .NET, TypeScript/JavaScript, C#, Java, PowerShell, SQL, practical Python scripting

**CI/CD:** CI/CD quality feedback, Azure DevOps, Jenkins, TeamCity, Git, GitHub Actions readiness, deployment quality gates

**Testing:** REST API testing, manual test design, UI, API, E2E, smoke, regression, exploratory, integration, test documentation

**Debugging:** Browser DevTools, logs, SQL validation, environment troubleshooting, defect triage  
**Infrastructure Context:** Docker / Kubernetes support context, Azure, Docker/Kubernetes support scenarios, Windows/Linux, staging environments  
**AI-assisted QA:** test idea generation, debugging support, codebase navigation, coverage review, and repetitive workflow automation

---

## EXPERIENCE

### DEFINELY - QA AUTOMATION ENGINEER

**Krakow, Poland**  
**06/2025 - Present**

- Improved and extended an API automation framework, increasing coverage from around 117 to 199 automated tests without increasing total runtime.
- Reduced automation log output from around 1.5 GB to 11 MB per run, making failures easier to analyze and route.
- Used API-driven setup, backend validation, and SQL/log investigation to shorten scenario validation from 5+ minutes to about 1 minute.
- Supported the Playwright and TypeScript automation direction for maintainable UI checks.
- Worked with QA and developers on acceptance criteria, defect evidence, quality feedback, and release readiness.
- Used AI-assisted workflows for repetitive QA work, test ideas, review support, debugging, and documentation while keeping human validation central.

### LEAPWORK - QA AUTOMATION ENGINEER (DEVOPS & AUTOMATION FOCUS)

**Krakow, Poland / Minsk, Belarus**  
**11/2018 - 03/2025**

- Built PowerShell scripts, JavaScript/Tampermonkey automations, helper tools, VM utilities, installation automation, and workflow improvements.
- Automated repetitive manual workflows and improved reproducibility of environment, release, and support checks.
- Supported Azure DevOps, YAML pipelines, monitoring, logs, virtual machines, Bicep, and infrastructure-aware delivery workflows.
- Worked with Docker/Kubernetes support scenarios including logs, services, practical debugging, and deployment-support tasks.
- Helped teams troubleshoot product, environment, and delivery issues with practical systems context.
- Improved internal documentation and shared technical knowledge to make complex workflows easier for QA, support, and engineering teams.

### EPAM SYSTEMS - AUTOMATION QA ENGINEER / TESTER (.NET)

**Minsk, Belarus**  
**09/2017 - 11/2018**

- Developed and maintained Selenium WebDriver regression tests with C#, Java, NUnit, and Jenkins.
  - Analyzed CI failures, prepared defect evidence, and supported enterprise release quality.
  - Added reusable helpers and documentation for maintainable automation work.
-

## VACANCY FIT NOTES

- Role context: Minimum 5 years automation experience; frontend and backend automation; SDLC; manual testing; C#; Selenium or Playwright; RestSharp; web testing; CI/CD; English B2/C1. Nice to have: desktop testing, accessibility testing, cloud, German. Responsibilities include building automation frameworks/scripts for web and API tests and collaborating with development/QA teams.
  - Positioning note: Strong fit through prior C#/.NET QA automation and current Playwright/API experience. Positioning should not overstate recent C# depth; frame it as a proven foundation plus active modern automation work.
- 

## EDUCATION

### **Belarusian State University of Informatics and Radioelectronics (BSUIR)**

Bachelor of Science in Digital Economy, 2013 - 2017
