

Yauheni Sheima

TEST ENGINEER

Krakow, Poland

Phone: +48 572 230 851

Email: yauhenisheima@gmail.com

LinkedIn: <https://www.linkedin.com/in/yauhei-sheima/>

EU Blue Card valid until 12/2027

PROFESSIONAL SUMMARY

Senior QA Automation Engineer / SDET with 7+ years of experience across UI/API testing, automation support, CI/CD-integrated quality workflows, framework improvement, defect investigation, test documentation, and release validation.

Relevant to Happy Team's Test Engineer role through REST API testing, UI automation, API validation, regression testing, defect investigation, test documentation, Agile collaboration, defect investigation, release-quality feedback, and practical collaboration with engineering teams.

SHORT RECRUITER SUMMARY

Senior QA Automation Engineer / SDET profile for Happy Team's Test Engineer role. Best overlap: REST API testing, UI automation, API validation, regression testing, defect investigation, test documentation, test maintainability, CI feedback, and evidence-based defect work.

MAIN STACK

MAIN STACK

CORE STRENGTHS

REST API testing UI automation API validation regression testing defect investigation test documentation

Agile collaboration

Requirement analysis and risk-based test design Maintainable regression, smoke, UI, API, and integration checks

Logs, SQL, Browser DevTools, and backend investigation for defect evidence

CI/CD-integrated test feedback and release support

Clear test documentation and cross-functional communication

AI-assisted test ideas, debugging, and repetitive workflow automation with human review

TECHNICAL SKILLS

Automation: REST API testing, API validation, Playwright direction, Selenium WebDriver, Postman/Newman, test framework improvement

Languages: TypeScript/JavaScript, C#, Java, PowerShell, SQL, practical Python scripting

CI/CD: Azure DevOps, Jenkins, TeamCity, Git, GitHub Actions readiness, deployment quality gates

Testing: REST API testing, UI automation, API validation, regression testing, UI, API, E2E, smoke, regression, exploratory

Debugging: Browser DevTools, logs, SQL validation, environment troubleshooting, defect triage

Infrastructure Context: Azure, Docker/Kubernetes support scenarios, Windows/Linux, staging environments

AI-assisted QA: test idea generation, debugging support, codebase navigation, coverage review, and repetitive workflow automation

EXPERIENCE

DEFINELY - QA AUTOMATION ENGINEER

Krakow, Poland
06/2025 - Present

- Improved and extended an API automation framework, increasing coverage from around 117 to 199 automated tests without increasing total runtime.
- Reduced automation log output from around 1.5 GB to 11 MB per run, making failures easier to analyze and route.
- Used API-driven setup, backend validation, and SQL/log investigation to shorten scenario validation from 5+ minutes to about 1 minute.
- Supported the Playwright and TypeScript automation direction for maintainable UI checks.
- Worked with QA and developers on acceptance criteria, defect evidence, quality feedback, and release readiness.
- Used AI-assisted workflows for repetitive QA work, test ideas, review support, debugging, and documentation while keeping human validation central.

LEAPWORK - QA AUTOMATION ENGINEER (DEVOPS & AUTOMATION FOCUS)

Krakow, Poland / Minsk, Belarus
11/2018 - 03/2025

- Built PowerShell scripts, JavaScript/Tampermonkey automations, helper tools, VM utilities, installation automation, and workflow improvements.
- Automated repetitive manual workflows and improved reproducibility of environment, release, and support checks.
- Supported Azure DevOps, YAML pipelines, monitoring, logs, virtual machines, Bicep, and infrastructure-aware delivery workflows.
- Worked with Docker/Kubernetes support scenarios including logs, services, practical debugging, and deployment-support tasks.
- Helped teams troubleshoot product, environment, and delivery issues with practical systems context.
- Improved internal documentation and shared technical knowledge to make complex workflows easier for QA, support, and engineering teams.

EPAM SYSTEMS - AUTOMATION QA ENGINEER / TESTER (.NET)

Minsk, Belarus
09/2017 - 11/2018

- Developed and maintained Selenium WebDriver regression tests with C#, Java, NUnit, and Jenkins.
- Analyzed CI failures, prepared defect evidence, and supported enterprise release quality.
- Added reusable helpers and documentation for maintainable automation work.

VACANCY FIT NOTES

- Role context: Test Engineer; Stack: REST, API
 - Positioning note: Imported from ranked shortlist CSV. Vacancy: Test Engineer.
-

EDUCATION

Belarusian State University of Informatics and Radioelectronics (BSUIR)

Bachelor of Science in Digital Economy, 2013 - 2017
