EU Blue Card valid until 12/2027

PROFESSIONAL SUMMARY

Senior QA Automation Engineer / SDET with 7+ years of experience across UI/API testing, automation support, CI/CD-integrated quality workflows, framework improvement, defect investigation, test documentation, and release validation.

Relevant to iTeamly's Senior QA Engineer (Robot Framework) role through Playwright, Python scripting, Robot Framework, REST API testing, SQL / database validation, CI/CD quality feedback, Docker / Kubernetes support context, defect investigation, release-quality feedback, and practical collaboration with engineering teams.

SHORT RECRUITER SUMMARY

Senior QA Automation Engineer / SDET profile for iTeamly's Senior QA Engineer (Robot Framework) role. Best overlap: Playwright, Python scripting, Robot Framework, REST API testing, SQL / database validation, CI/CD quality feedback, test maintainability, CI feedback, and evidence-based defect work. Ramp-up topics: formal test-management scope.

MAIN STACK

MAIN STACK

CORE STRENGTHS

Playwright Python scripting Robot Framework REST API testing SQL / database validation
CI/CD quality feedback Docker / Kubernetes support context
performance testing awareness manual test design Requirement analysis and risk-based test design
Maintainable regression, smoke, UI, API, and integration checks
Logs, SQL, Browser DevTools, and backend investigation for defect evidence
CI/CD-integrated test feedback and release support
Clear test documentation and cross-functional communication

TECHNICAL SKILLS

Automation: Playwright, Robot Framework, REST API testing, Playwright direction, Selenium WebDriver, Postman/Newman, test framework improvement

Languages: Python scripting, SQL / database validation, TypeScript/JavaScript, C#, Java, PowerShell, SQL, practical Python scripting

CI/CD: CI/CD quality feedback, Azure DevOps, Jenkins, TeamCity, Git, GitHub Actions readiness, deployment quality gates

Testing: REST API testing, SQL / database validation, performance testing awareness, manual test design, UI,

API, E2E, smoke, regression, exploratory

Debugging: Browser DevTools, logs, SQL validation, environment troubleshooting, defect triage

Infrastructure Context: Docker / Kubernetes support context, Azure, Docker/Kubernetes support scenarios, Windows/Linux, staging environments

AI-assisted QA: test idea generation, debugging support, codebase navigation, coverage review, and repetitive workflow automation

EXPERIENCE

DEFINELY - QA AUTOMATION ENGINEER

Krakow, Poland

06/2025 - Present

- Improved and extended an API automation framework, increasing coverage from around 117 to 199 automated tests without increasing total runtime.
- Reduced automation log output from around 1.5 GB to 11 MB per run, making failures easier to analyze and route.
- Used API-driven setup, backend validation, and SQL/log investigation to shorten scenario validation from 5+ minutes to about 1 minute.
- Supported the Playwright and TypeScript automation direction for maintainable UI checks.
- Worked with QA and developers on acceptance criteria, defect evidence, quality feedback, and release readiness.
- Used AI-assisted workflows for repetitive QA work, test ideas, review support, debugging, and documentation while keeping human validation central.

LEAPWORK - QA AUTOMATION ENGINEER (DEVOPS & AUTOMATION FOCUS)

Krakow, Poland / Minsk, Belarus

11/2018 - 03/2025

- Built PowerShell scripts, JavaScript/Tampermonkey automations, helper tools, VM utilities, installation automation, and workflow improvements.
- Automated repetitive manual workflows and improved reproducibility of environment, release, and support checks.
- Supported Azure DevOps, YAML pipelines, monitoring, logs, virtual machines, Bicep, and infrastructure-aware delivery workflows.
- Worked with Docker/Kubernetes support scenarios including logs, services, practical debugging, and deployment-support tasks.
- Helped teams troubleshoot product, environment, and delivery issues with practical systems context.
- Improved internal documentation and shared technical knowledge to make complex workflows easier for QA, support, and engineering teams.

EPAM SYSTEMS - AUTOMATION QA ENGINEER / TESTER (.NET)

Minsk, Belarus

09/2017 - 11/2018

- Developed and maintained Selenium WebDriver regression tests with C#, Java, NUnit, and Jenkins.
 - Analyzed CI failures, prepared defect evidence, and supported enterprise release quality.
 - Added reusable helpers and documentation for maintainable automation work.
-

VACANCY FIT NOTES

- Role context: 5+ years testing/QA automation; API and end-to-end testing; practical Python, Playwright, Robot Framework and SQL; microservices architecture; cloud-based systems; Agile; CI/CD integration. Responsibilities include test strategy, test plans/cases, API/E2E automation, manual testing for complex cases, quality/performance/reliability and QA process improvement.
 - Positioning note: One of the cleanest fits among active targets. Positioning: Python automation, Playwright/ API coverage, SQL, distributed systems, CI/CD integration, and pragmatic manual testing for edge cases. Salary missing, so verify during form or outreach.
-

EDUCATION

Belarusian State University of Informatics and Radioelectronics (BSUIR)

Bachelor of Science in Digital Economy, 2013 - 2017
