EU Blue Card valid until 12/2027

## PROFESSIONAL SUMMARY

Senior QA Automation Engineer / SDET with 7+ years of experience across UI/API testing, automation support, CI/CD-integrated quality workflows, framework improvement, defect investigation, test documentation, and release validation.

Relevant to People More's Manual QA role through REST API testing, manual test design, UI automation, API validation, regression testing, defect investigation, test documentation, defect investigation, release-quality feedback, and practical collaboration with engineering teams.

## SHORT RECRUITER SUMMARY

Senior QA Automation Engineer / SDET profile for People More's Manual QA role. Best overlap: REST API testing, manual test design, UI automation, API validation, regression testing, defect investigation, test maintainability, CI feedback, and evidence-based defect work.

## MAIN STACK

## MAIN STACK

## CORE STRENGTHS

- REST API testing
- manual test design
- UI automation
- API validation
- regression testing
- defect investigation
- test documentation
- Agile collaboration
- Requirement analysis and risk-based test design
- Maintainable regression, smoke, UI, API, and integration checks
- Logs, SQL, Browser DevTools, and backend investigation for defect evidence
- CI/CD-integrated test feedback and release support
- Clear test documentation and cross-functional communication
- AI-assisted test ideas, debugging, and repetitive workflow automation with human review

## TECHNICAL SKILLS

**Automation:** REST API testing, API validation, Playwright direction, Selenium WebDriver, Postman/Newman, test framework improvement

**Languages:** TypeScript/JavaScript, C#, Java, PowerShell, SQL, practical Python scripting

**CI/CD:** Azure DevOps, Jenkins, TeamCity, Git, GitHub Actions readiness, deployment quality gates

**Testing:** REST API testing, manual test design, UI automation, API validation, regression testing, UI, API, E2E, smoke, regression

**Debugging:** Browser DevTools, logs, SQL validation, environment troubleshooting, defect triage

**Infrastructure Context:** Azure, Docker/Kubernetes support scenarios, Windows/Linux, staging environments

**AI-assisted QA:** test idea generation, debugging support, codebase navigation, coverage review, and repetitive workflow automation

---

## EXPERIENCE

### DEFINELY - QA AUTOMATION ENGINEER

**Krakow, Poland**  
**06/2025 - Present**

- Improved and extended an API automation framework, increasing coverage from around 117 to 199 automated tests without increasing total runtime.
- Reduced automation log output from around 1.5 GB to 11 MB per run, making failures easier to analyze and route.
- Used API-driven setup, backend validation, and SQL/log investigation to shorten scenario validation from 5+ minutes to about 1 minute.
- Supported the Playwright and TypeScript automation direction for maintainable UI checks.
- Worked with QA and developers on acceptance criteria, defect evidence, quality feedback, and release readiness.
- Used AI-assisted workflows for repetitive QA work, test ideas, review support, debugging, and documentation while keeping human validation central.

### LEAPWORK - QA AUTOMATION ENGINEER (DEVOPS & AUTOMATION FOCUS)

**Krakow, Poland / Minsk, Belarus**  
**11/2018 - 03/2025**

- Built PowerShell scripts, JavaScript/Tampermonkey automations, helper tools, VM utilities, installation automation, and workflow improvements.
- Automated repetitive manual workflows and improved reproducibility of environment, release, and support checks.
- Supported Azure DevOps, YAML pipelines, monitoring, logs, virtual machines, Bicep, and infrastructure-aware delivery workflows.
- Worked with Docker/Kubernetes support scenarios including logs, services, practical debugging, and deployment-support tasks.
- Helped teams troubleshoot product, environment, and delivery issues with practical systems context.
- Improved internal documentation and shared technical knowledge to make complex workflows easier for QA, support, and engineering teams.

### EPAM SYSTEMS - AUTOMATION QA ENGINEER / TESTER (.NET)

**Minsk, Belarus**  
**09/2017 - 11/2018**

- Developed and maintained Selenium WebDriver regression tests with C#, Java, NUnit, and Jenkins.
- Analyzed CI failures, prepared defect evidence, and supported enterprise release quality.
- Added reusable helpers and documentation for maintainable automation work.

---

## VACANCY FIT NOTES

- Role context: Role: Manual QA; Stack: Manual API testing; Salary: 60-100 PLN/h
  - Positioning note: Imported from CSV shortlist. Fit: 3/10. CV file: qa-devops-cv.pdf
-

## **EDUCATION**

**Belarusian State University of Informatics and Radioelectronics (BSUIR)**

Bachelor of Science in Digital Economy, 2013 - 2017
