EU Blue Card valid until 12/2027

PROFESSIONAL SUMMARY

Senior QA Automation Engineer / SDET with 7+ years of experience across UI/API testing, automation support, CI/CD-integrated quality workflows, framework improvement, defect investigation, test documentation, and release validation.

Relevant to StoneX Poland's QA Automation Lead role through Playwright, Selenium WebDriver, Java, Python scripting, REST API testing, CI/CD quality feedback, defect investigation, release-quality feedback, and practical collaboration with engineering teams.

SHORT RECRUITER SUMMARY

Senior QA Automation Engineer / SDET profile for StoneX Poland's QA Automation Lead role. Best overlap: Playwright, Selenium WebDriver, Java, Python scripting, REST API testing, CI/CD quality feedback, test maintainability, CI feedback, and evidence-based defect work.

MAIN STACK

MAIN STACK

CORE STRENGTHS

- Playwright
 - Selenium WebDriver
 - Java
 - Python scripting
 - REST API testing
 - CI/CD quality feedback
 - Requirement analysis and risk-based test design
 - Maintainable regression, smoke, UI, API, and integration checks
 - Logs, SQL, Browser DevTools, and backend investigation for defect evidence
 - CI/CD-integrated test feedback and release support
 - Clear test documentation and cross-functional communication
 - AI-assisted test ideas, debugging, and repetitive workflow automation with human review
-

TECHNICAL SKILLS

Automation: Playwright, Selenium WebDriver, REST API testing, Playwright direction, Postman/Newman, test framework improvement

Languages: Java, Python scripting, TypeScript/JavaScript, C#, PowerShell, SQL, practical Python scripting

CI/CD: CI/CD quality feedback, Azure DevOps, Jenkins, TeamCity, Git, GitHub Actions readiness, deployment quality gates

Testing: REST API testing, UI, API, E2E, smoke, regression, exploratory, integration, test documentation

Debugging: Browser DevTools, logs, SQL validation, environment troubleshooting, defect triage

Infrastructure Context: Azure, Docker/Kubernetes support scenarios, Windows/Linux, staging environments

AI-assisted QA: test idea generation, debugging support, codebase navigation, coverage review, and repetitive workflow automation

EXPERIENCE

DEFINELY - QA AUTOMATION ENGINEER

Krakow, Poland

06/2025 - Present

- Improved and extended an API automation framework, increasing coverage from around 117 to 199 automated tests without increasing total runtime.
- Reduced automation log output from around 1.5 GB to 11 MB per run, making failures easier to analyze and route.
- Used API-driven setup, backend validation, and SQL/log investigation to shorten scenario validation from 5+ minutes to about 1 minute.
- Supported the Playwright and TypeScript automation direction for maintainable UI checks.
- Worked with QA and developers on acceptance criteria, defect evidence, quality feedback, and release readiness.
- Used AI-assisted workflows for repetitive QA work, test ideas, review support, debugging, and documentation while keeping human validation central.

LEAPWORK - QA AUTOMATION ENGINEER (DEVOPS & AUTOMATION FOCUS)

Krakow, Poland / Minsk, Belarus

11/2018 - 03/2025

- Built PowerShell scripts, JavaScript/Tampermonkey automations, helper tools, VM utilities, installation automation, and workflow improvements.
- Automated repetitive manual workflows and improved reproducibility of environment, release, and support checks.
- Supported Azure DevOps, YAML pipelines, monitoring, logs, virtual machines, Bicep, and infrastructure-aware delivery workflows.
- Worked with Docker/Kubernetes support scenarios including logs, services, practical debugging, and deployment-support tasks.
- Helped teams troubleshoot product, environment, and delivery issues with practical systems context.
- Improved internal documentation and shared technical knowledge to make complex workflows easier for QA, support, and engineering teams.

EPAM SYSTEMS - AUTOMATION QA ENGINEER / TESTER (.NET)

Minsk, Belarus

09/2017 - 11/2018

- Developed and maintained Selenium WebDriver regression tests with C#, Java, NUnit, and Jenkins.
- Analyzed CI failures, prepared defect evidence, and supported enterprise release quality.
- Added reusable helpers and documentation for maintainable automation work.

VACANCY FIT NOTES

- Role context: Hands-on QA Automation Lead for Global Payments. Define quality engineering standards, architect scalable automation, mentor engineers, own end-to-end UAT programs, partner with Product/DevOps/Operations, improve testability, observability and automation in production-critical payments platform.

- Positioning note: Very strong target but leadership-heavy. Positioning should emphasize QA architecture, automation framework ownership, defect prevention, release readiness, mentoring/standards, and payments/business-critical systems. Need salary verification before investing too much time.
-

EDUCATION

Belarusian State University of Informatics and Radioelectronics (BSUIR)

Bachelor of Science in Digital Economy, 2013 - 2017
